

Beaver County Career & Technology Center

Welding Technology Grading Policy

2020-2021

Students in the Welding Technology program will be assessed in three different categories: Work Ethics, Theory Work, and Lab Work. These categories carry varying weights that are tallied to determine the student's overall grade for the grading period. Below is a list of what constitutes each category and the accompanying weight.

Work Ethic Grade- %

Students can earn 10 points per day for work ethic. Students will be evaluated in the following categories.

- Proper P.P.E (personal protective equipment)
- Time management
- Professionalism
- Following directions
- Following procedures

Theory Grade- %

Lab Grade- %

At the end of each nine-week period, grades are calculated and reported following the Beaver County Career and Technology Center grading scale. Grades earned will be reflected on the report card that students receive from their sending school. Mid-way through each grading period, progress reports will be mailed home for students who are earning a 75% or below. However, parents are encouraged to check their child's grade periodically throughout the year by visiting www.classmategradesus.org or by contacting me directly.

Beaver County Career and Technology Centers Grading Scale

%-A

%-B

%-C

%-D

%-F

*****Beaver County Career and Technology Center uses a different grading scale than the sending schools grading scale.*****

Additional Guidelines for Grades:

Make-up Work Policy

Late Policy

Extra Credit Policy

Extra credit will be issued and awarded at the teacher's discretion. A student should not plan on receiving any extra credit opportunities during a grading period.
